DETAILED ACTION

1. Receipt is acknowledged of amendments and drawings filed 10/07/2004.
2. Receipt is acknowledged of IDS filed on 8/8/2004.
3. Claims 1, 4-38, and 40-43 are presented for examination.

Priority

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

5. Claims 1, 4-38, and 40-43 are allowed.
6. The following is an examiner's statement of reasons for allowance: Although the prior art of record, Yanai et al. U.S. 5,369,512, discloses a structure of a liquid crystal display comprising of a display electrode with a variable compensator capacitor, taken alone or in combination with any other references [as an example by the examiner, U.S. reference 6,760,081 of Takagi teaches liquid crystal display device having uniform feed-through voltage components, wherein the width of the gate signal line becoming narrower and thereby capacitance become smaller as the distance from the gate signal input portion becomes larger; see col.6, lines 10+] fails to teach each of the pixels, each of the first scanning line and the second scanning line having a first input end so that the scanning line driving circuit can input signals into the first scanning line and the second scanning line through the first input ends; wherein the larger a distance between the first input end or the second scanning line and a corresponding one of the plurality of pixels is, the

larger a capacitance of the compensating capacitor of the corresponding pixel is. These limitations in conjunction with other limitations in the claimed invention were not shown by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kuroha et al. (U.S. 6,028,650) discloses liquid crystal display device having uniform feed-through voltage in panel.

Tanahara et al. (U.S. 6,738,106) teaches liquid crystal display device.
